Run doctex to produce the tex file, then pictures can be created using SML code. Run docsml before running pdflatex...

```
doctex tryit.doc
docsml tryit.doc
poly < tryit.sml
pptexenv latex tryit.tex
dvips tryit.dvi
ps2pdf tryit.ps
```

```
chmod 755 run.sh
```

```
use "fpic.sml";
processTeXfile "tryit";
use "fpicpics.sml";
```
